F R U I T

Fruit is a very important tooth building food.

It has minerals and vitamins which the body needs to build good teeth and gums.

Fresh, cooked and dried fruits are better for us than very sweet desserts.

Candy and very sweet desserts may cause tooth decay.

Oranges, apples, grapefruit, lemons, bananas, apricots, pears, and peaches are some of the common fruits that are good for the teeth and gums.

Q U E S T I O N S

How many fruits did we name? _____

Write their names in the following spaces: _____

The words in this sentence are mixed up. Make them read correctly.

teeth for is good our Fruit. _____
