PREVENT TOOTH TROUBLES

**brush teeth
after eating**

**eat fewer
sweets**

**see your dentist
regularly**

Why does the average teen-ager have so much more tooth decay than any one else?

Probably for one or more of these reasons:

He doesn't take time to brush his teeth properly after eating

He eats sweets for in-between-meal snacks to satisfy his hunger

He puts off going to the dentist

Attractive healthy teeth are important to *you*.
They make you look better, make eating more enjoyable
and will be an asset when you begin looking for a job.

Look at your teeth — everybody else does.
